

## *Job opportunity*

### *Sustainability – Experienced Consultant (m/f)*

#### *Your mission*

PwC Luxembourg's Sustainability team specializes in the environmental analysis of buildings and related technical studies. As part of our growth, we are looking for experienced engineers (M/F).

The team provides advice in sustainable construction and energy, as well as helping clients obtain environmental certifications such as BREEAM and HQE®.

Your duties will consist of:

- Taking part in advisory projects in the field of the environment, energy and sustainable construction, including aspects of social responsibility;
- Helping to carry out energy audits, developing improvement plans and ensure that the planned measures are implemented correctly;
- Helping to conduct technical studies of buildings under construction or major renovation. These studies include calculating the daylight factor, feasibility studies into renewable energy, optimising projects by way of a “life-cycle cost” approach and checking thermal comfort using a dynamic thermal simulation, life-cycle analyses, etc.
- Perform environmental and security authorization files (Commodo / Incommodo) for large developments
- Perform technical Due diligence during deals.

#### *Your profile*

- You are a qualified (electro)mechanical, construction or electrical engineer, specialising in energy. An additional qualification in Business or Finance would be an advantage;
- You have already held an advisory role in the field of the environment, energy or sustainable construction;
- You have good analytical skills, you focus on the bigger picture, and you are organised and disciplined;
- You are energetic, flexible and able to work both independently and as part of a team, depending on the situation;
- You have an excellent command of French and English (both written and spoken) and you have good writing skills. Knowledge of German or Luxembourgish would be an advantage;
- You cope well in stressful situations and you are used to managing tight deadlines;
- You are able to build strong and lasting client relationships;
- You have excellent knowledge of key desktop software (such as MS Office) and you have already worked with numerous engineering programs (AutoCAD, IES-VE, TRNSYS, DIALux, etc.).
